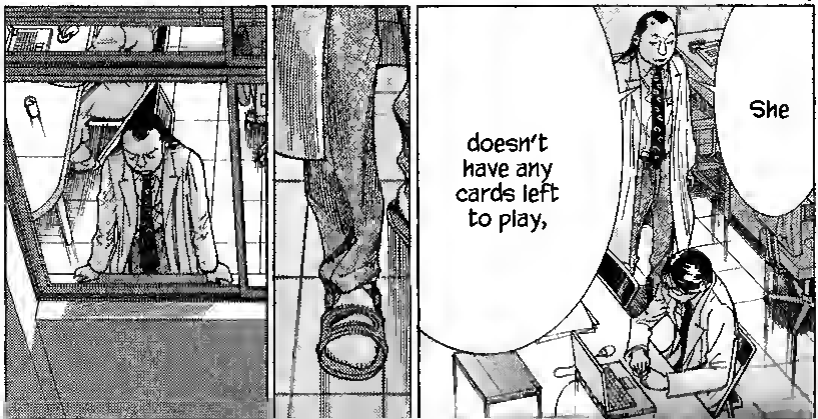
Chapter 160 - Reduction and Provocation

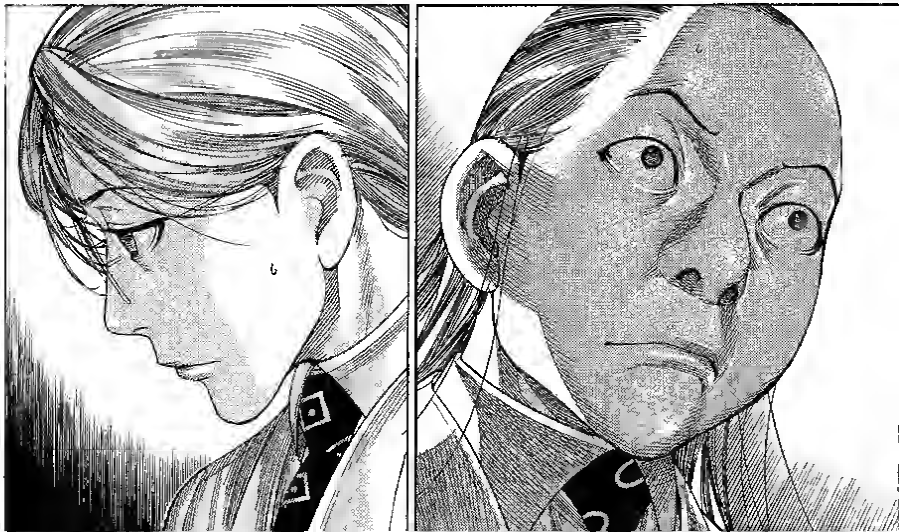
Cardiothoracic Department
2
It seems Noguchi-sensei decided
to go with Kunitachi-sensei's plan and let him perform the surgery.

Is, is that so?
It'll go down next Tuesday.
And the ones in charge of his physical condition prior to the surgery will be Kirishima-sensei and Fujiyoshi-sensei.
Katou-sensei will be completely cut out.



She doesn't have any cards left to play,

one day after the surgery.
since the election will take place

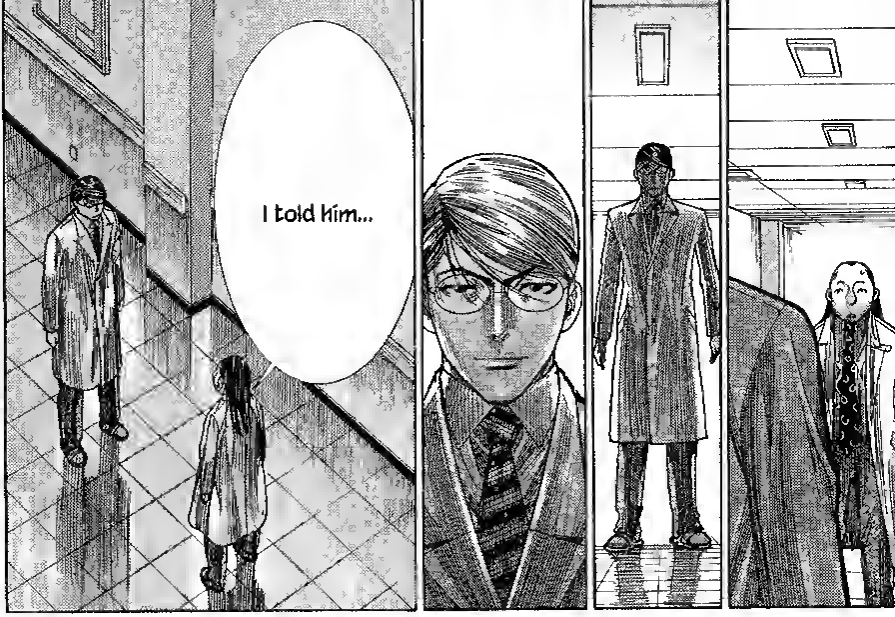


How is the Katou faction doing?
The Kirishima faction is sticking together.
Kirishima-sensei did a great job coming up with such a good treatment plan for Noguchi-sensei.
He came through. He didn't betray us.
If it's now,
You can still come back to the Kirishima faction,
get it?

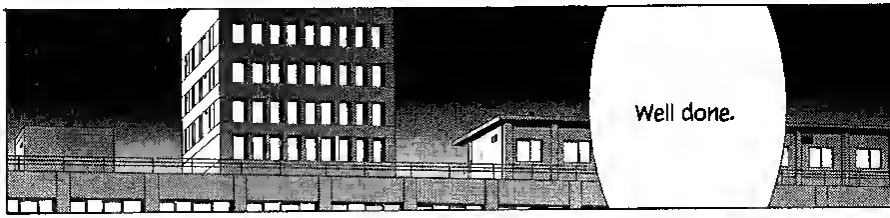
OUTERWORLD SCANS

We'll hold our last meeting,
before Noguchi-sensei's surgery
You should come.
Once Kunitachi-sensei successfully pulls off the surgery,
it will be too late for you to change your mind.
You will be seen as the worst opportunist if you miss your chance.
Even if

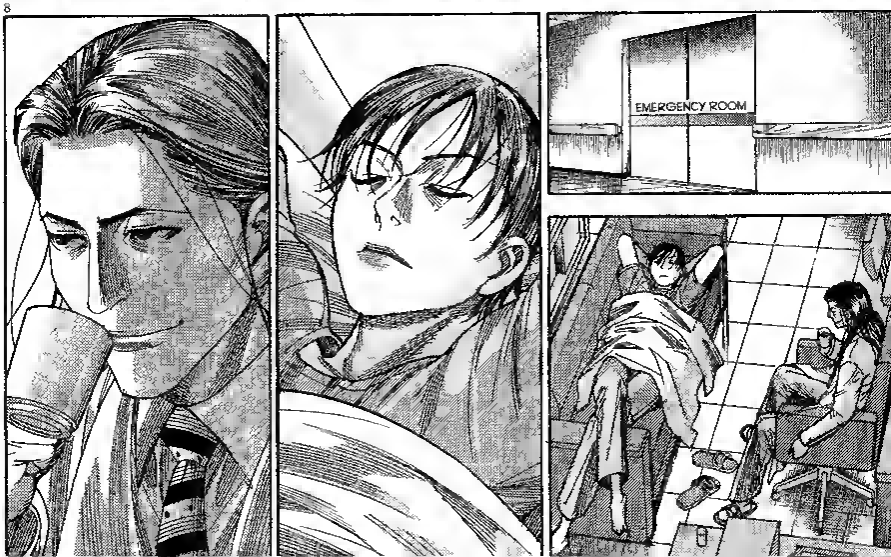
You do understand that sticking to Katou-sensei will put you at a disadvantage?
the surgery fails,
Kunitachi-sensei won't be put at a disadvantage, since it's a difficult surgery to begin with.
I know that...
Right now,
Kirishima-sensei is the safest bet.
As the runner up, he still stands a chance.
I'll be waiting...
.....



I told him...



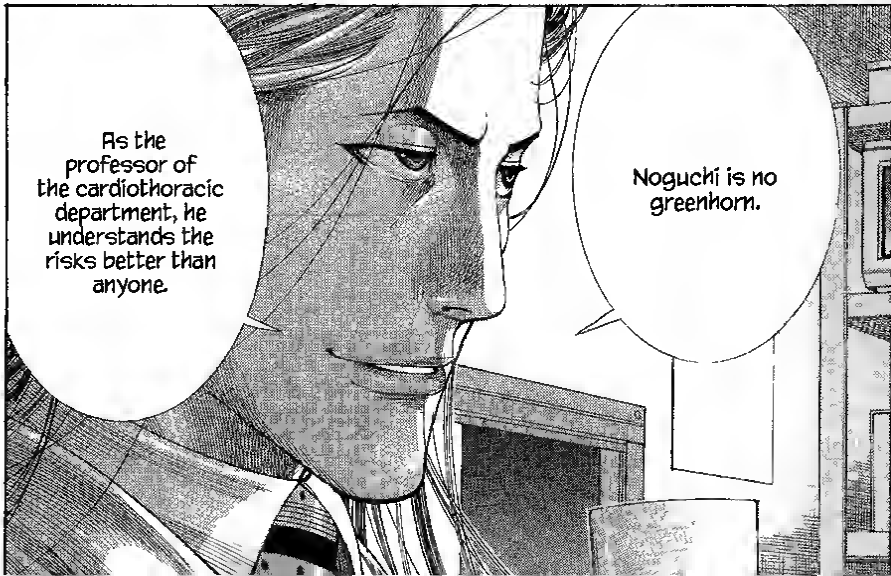
Well done.



EMERGENCY ROOM

The more he delays, the more difficult the stent surgery becomes.
Thanks to Noguchi-sensei's surgery, Shouichiro will rise to the top.
The situation became bad for Katou.
fufu-fufu-fu.
Her treatment plan would be the safest one in this case, yet he didn't choose it.
She's dead meat.
She no longer stands a chance.

The day you become mine draws near.
To choose Kunitachi,
is the worst mistake that old man can make.



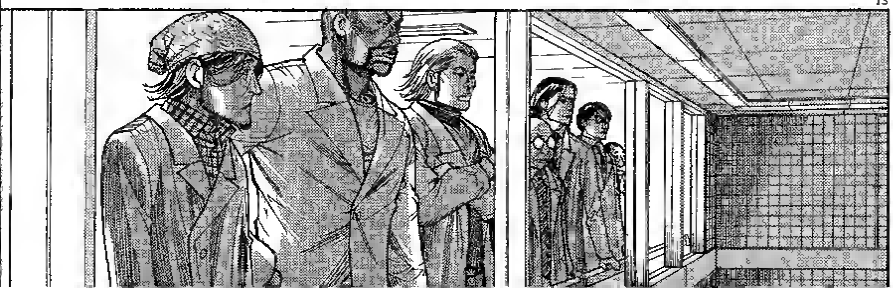
Noguchi is no greenhorn.
As the professor of the cardiothoracic department, he understands the risks better than anyone.

He authorised Kunitachi to perform the surgery,
you're in no position to object.
You have no choice,
but to accept the patient's wishes, fufufufu.

Kitou,

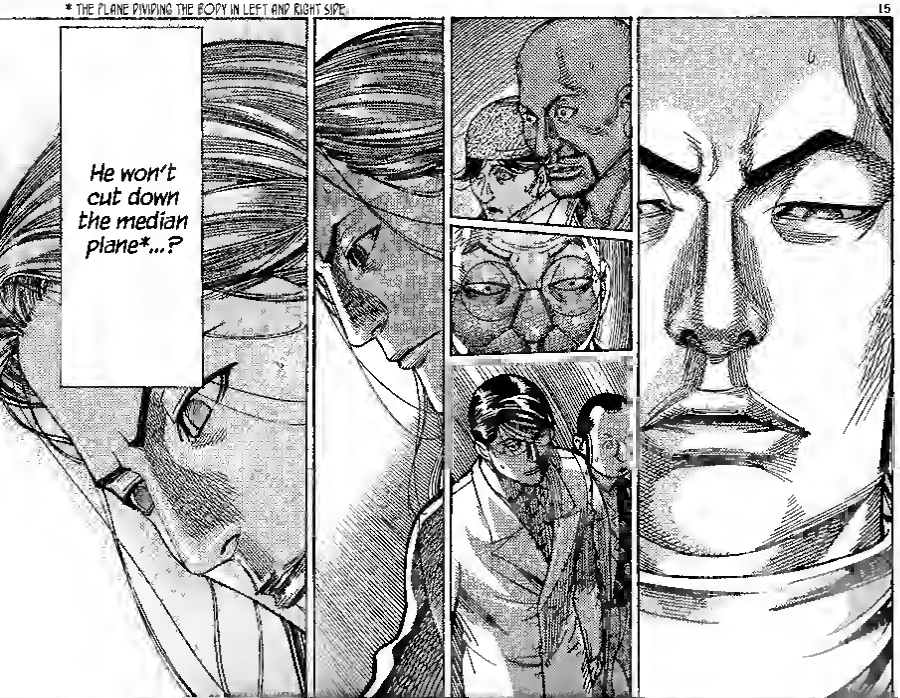
tomorrow at 10am,
come watch my bypass surgery.
Bring Kunitachi
and the foreigners with you.

I'll show you something interesting.



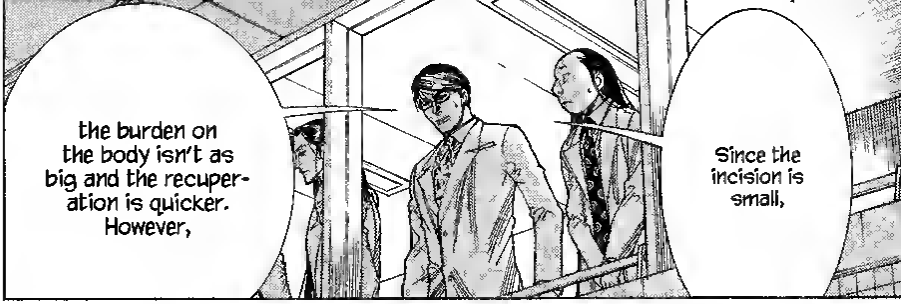
Scalpel.
What does he plan on showing us...?
It's a normal bypass surgery...

* THE PLANE DIVIDING THE BODY IN LEFT AND RIGHT SIDE.



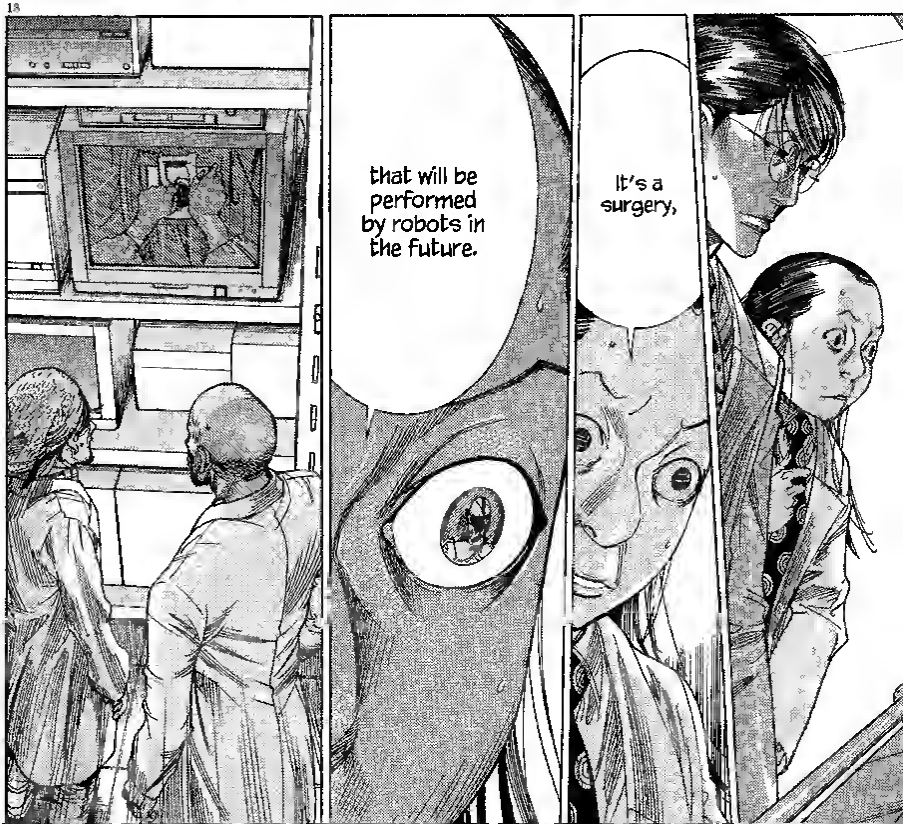
OUTERWORLD SCANS

a minimally invasive cardiovascular surgery is...
17
Usually the surgery is performed by making an incision along the medial plane,
but in this case,
MEDIAN PLANE INCISION
INCISION BETWEEN THE RIBS
the surgery is performed by making a small about 5-7cm long incision between the ribs.
.....
Done.



Since the incision is small,
the burden on the body isn't as big and the recuperation is quicker. However,

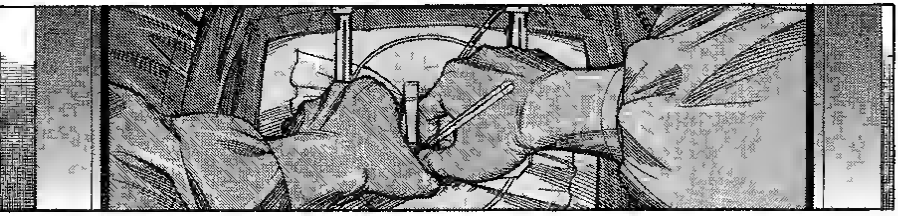
the operating space is small, so the surgeon must poses superior surgical skills. Not to mention that the risk of damaging blood vessels is also high.
That's why the surgery is also called a double edged sword.



It's a surgery,
that will be performed by robots in the future.

I can't see...
The operating space is so small I can't see a thing...
Judging from the size of the forceps*...
It's less than 7 centi-metres in size...?

* A SURGICAL INSTRUMENT USED FOR GRABBING AND HOLDING OBJECTS.



* THE ARTERY LOCATED ANTERIORLY IN THE THORAX. OFTEN USED FOR CORONARY ARTERY BYPASS GRAFTING

OUTERWORLD SCANS

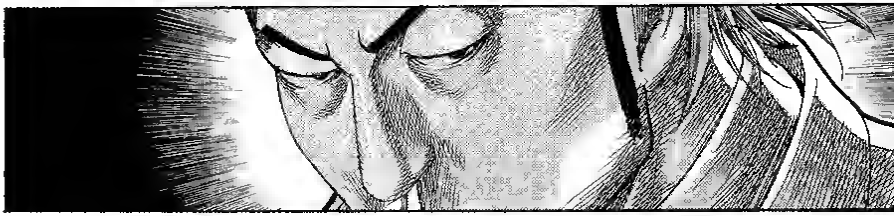
Internal thoracic artery obtained!!

Connecting it to the coronary artery*!!

* ARTERY THAT SUPPLIES BLOOD TO THE HEART

you can't deny his high level of skill,
Kunitachi-sensei.
If it's Asada,
In this case the situation was just right for such a surgery.
* A SURGICAL PROCEDURE USED TO RE-OPEN A STIFF HEART VALVE
he could even perform a valvuloplasty* in that small space.
If it's Asada,
I assure you.

Even a surgical robot
would need 10 more years to catch up to his skill level.



He connected the blood vessels.
It seems like he didn't damage them.
Marvelous...!!

Maybe that he can do an artificial blood vessel replacement surgery with an MICS...?
what kind of statement he wanted to make with this surgery.
I wonder
It wouldn't make sense.
That's unlikely.

He's provoking me.
It's a fight.

He's saying he's number one.
And that an incapable doctor like me,
should step down from the position as attending physician.
